

Pet Partners Crisis Housing Program

Families belong together. When an eviction occurs, the whole family is affected — even pets. While housing instability is often a temporary situation for humans, for pets, who are often surrendered to a shelter or left behind, the situation is permanent. The APA believes that families should stay together, so we help make this possible by providing temporary foster homes, supplies, and veterinary care to families being evicted or otherwise losing their housing.

The Pet Partners Crisis Housing Program is available to households in St. Louis County who are experiencing the loss of a home due to eviction or foreclosure. Food, vaccinations, and flea/tick/heartworm preventative are provided to pets at no charge while being cared for by the APA.

Program requirements:

- Official documentation of eviction or foreclosure must be provided.
- Dropping off a pet must be scheduled in advance.
- Pets must be spayed/neutered. We will provide this service at no charge if a pet is unaltered.
