

## Come Visit Us At Booth 803

Built for Shelters. Engineered for Performance.

At Aeolus, we don't just build animal care spaces—we engineer high-performance environments designed around the real needs of shelters, municipalities, veterinarians and other pet care professionals.

With over 20 years of manufacturing experience, we understand the daily challenges—sanitation, workflow efficiency, and reducing animal stress. That's why our solutions are built to:

- Create stress free environments for animals
- Improve staff efficiency and safety
- Withstand demanding, high-use conditions

Our in-house engineering team partners with you to design custom kennel systems and layouts that fit your facility—not a one-size-fits-all approach.

As the manufacturer, we eliminate the middleman—delivering premium equipment at highly competitive pricing.

Have a project coming up?

Bring your blueprints or layouts to Booth 803 and let's bring your vision to life.

- Custom design
- Transparent pricing
- Built to last

# Build with Confidence Customize it Your Way

## Designed and Manufactured by Aeolus

As a direct manufacturer, Aeolus integrates design, engineering, and production—giving you complete flexibility to create a system tailored to your facility. Instead of adapting to standard offerings, your solution is built around your workflow, your space, and your long-term needs.

## Customize layouts, finishes, and features to match your workflow, brand, and future growth.

Aeolus animal care environments are designed with flexibility at the core. Our durable, hygienic wall panel systems can be tailored in size, material, and finish to meet the specific needs of your facility. Smooth, non-porous surfaces resist moisture and simplify cleaning, while select panel options provide sound reduction and thermal insulation.

The modular design allows you to configure your space with precision—adapting to your workflow today while giving you the freedom to evolve as your facility grows.

## Key Design Considerations

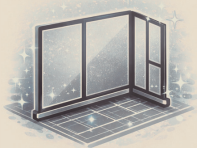

- Select layouts and finishes that promote hygiene, efficient cleaning, and proper containment
- Design adaptable spaces that support intake, quarantine, adoption, and recovery areas
- Minimize stress with sound-dampening materials and thoughtful sightline control
- Ensure doors, gates, and pathways support safe handling and clear staff movement
- Choose materials aligned with Fear Free® principles for a calmer, more comfortable environment

*Aeolus listened to our needs, took my hand drawn sketches and created the custom beautiful 60 kennel boarding facility of my dreams"*

-S. Cooks, San Antonio, TX

## Getting Started:

### 1. Choose Your Wall Material:

- HDPE
- FRP
- 304 Medical Grade Stainless Steel
- Laminated Composite
- Combination with Ventilated Upper Panel

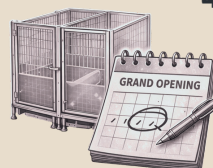

### 3. Choose Your Add-Ons

- Back Wall Transfer Door
- Side Wall Transfer Door
- Ceiling Grid Top Cover
- Swivel Feeding Bowls

### 2. Choose Your Gate:

- Full Tempered Glass
- Tempered Glas + Stainless Steel Grid
- Full Stainless Steel Grid
- Stainless Steel Sheet + Stainless Steel Grid
- HDPE + Stainless Steel Grid
- FRP+ Stainless Steel Grid

### 4. Turn In Essential Information

- Floor Plan Showing the Dimensions of Your Space
- Purpose of Kennels- Shelter, Boarding, Recovery, etc.
- Project Timeline
- Delivery Address
