

# COVID-19 PREPAREDNESS

*a plan for pets*

## Plan

- Make a plan now, even if you are feeling well. Identify a friend or neighbor who can care for your animals in the event you become ill or hospitalized.
- Have a backup caregiver.
- Make sure your pet's microchip registration information is current.

## Prepare

- Prep your pet supply kit with at least two weeks of supplies, and tell your emergency caregiver about it.
